### TO WHOM IT MAY CONCERN

I have known Professor V. David Sanchez A. for over a decade. We have successfully collaborated in different areas. i am honored to be an Editorial Board Member of Neurocomputing Journal. David founded and has been Editor-in-Chief of this extraordinary world-leading journal published by Elsevier Science from the very beginning of 1989. By invitation, David also contributed his work in the special issues of this journal.

David is a world-recognised R&D leader. His space related activities when he was based in Europe and most recently in USA have gained notable recognition. So are his contributions to the area of computational intelligence, artificial brain, computer vision and robotics. Over the years he has led efforts to contribute to different neural network architectures and topics including multilayer perceptrons, radial basis function networks, learning theory as well as applications.

I believe that Professor sanchez has determination, hard working nature and research interests which all contribute to him being an excellent R&D leader. I wish him every success.

Please donot hesitate to contact me for any further information you might need.
